錄像光碟訂購

打開溝通之門工作坊由香港中文大學耳鼻喉—頭頸外科學系言語治療科及人類傳意科學研究所於二零零七年六月舉辦。是次工作坊授予家長、教師及其他照顧者一套實用兼啟發性的日常處理技巧，並以大量鮮明生活例子闡述有關理論，反應踴躍。香港中文大學現將工作坊之現場錄像製成 DVD，供大眾訂購。

內容簡介

對於患有自閉症或「口腔感官運動障礙」的孩子，口部感官失調、高度抗拒性及肌肉協調困難是他們掌握進食技巧及語言發展的主要障礙。其父母、老師或照顧者於家校日程中常會遇到孩子的一些不當行為，如緊咬物件、時常置放物件於口腔中、及於社交場合中進行不適當的口腔感官刺激或迴避行為。此工作坊會解釋上述行為的成因及介紹處理「口腔感覺運動障礙」的有效方法。

- 1) 口腔感官運動障礙的成因
- 2) 口腔感官運動障礙對進食、口腔衛生及言語發展的影響
- 3) 在家校如何管理有口腔感官運動障礙的孩子
- 4) 如何運用口腔感官工具及玩具訓練孩子

Understanding and Managing Oral Sensory-Motor Deficits in Children with Special Needs Parent and Teacher Workshop 2007

Workshop Video Order

The **Oral Sensory-Motor Deficits** workshop was held in June 2007, by the **Division of Speech Therapy, Department of Otorhinolaryngology, Head and Neck Surgery, and The Institute of Human Communicative Research, The Chinese University of Hong Kong**. This well received workshop provided parents, teachers and carers an instructive hands-on approach to daily management with a myriad of vivid life examples to illustrate theoretical techniques. The Chinese University of Hong Kong has captured this exciting workshop on video and the DVD copies are now available to the public.

About the Workshop

Mouth sensitivities, oral defensiveness and incoordination are major obstacles to feeding, speech and language development in children with autism or oral sensory-motor disorders. Parents and teachers taking care of these children are often confronted with problems such as biting, excessive mouthing of objects, socially inappropriate oral sensory-seeking or sensory-avoiding behaviors, in the course of the school days and at home. The workshop provides parents, teachers and caregivers with an understanding of these problems and strategies for the management of oral sensory motor deficits (OSMD) in classroom and home environment.

- 1) Causes for Oral Sensory Motor Deficits (OSMD)
- 2) Impact of OSMD on feeding, hygiene & speech development
- 3) Management of children with OSMD at home and schools
- 4) Training children with oral sensory tools and toys
